
Electric Vehicle Adoption in Washington State

A Data-Driven Analysis of Market Trends, Popular Models, and Clean Fuel Eligibility

EV Concentration by County

King County dominates the EV landscape in Washington State.

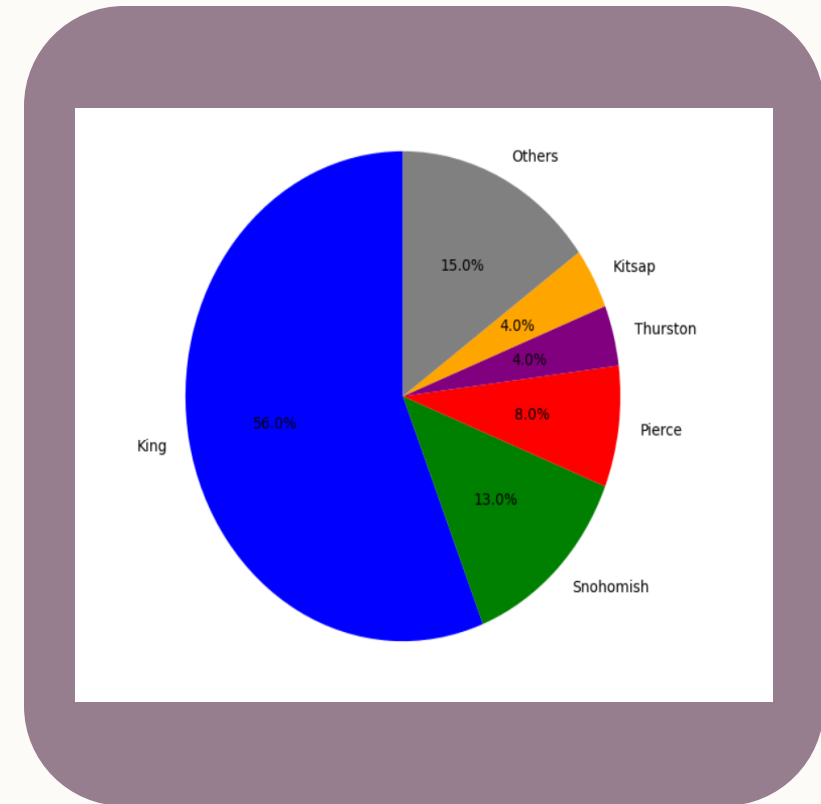

King: 56.1%

Snohomish: 13.3%

Pierce: 8.1%

Thurston: 3.9%

Kitsap: 3.7%

Market Leaders: Top EV Makers

Tesla captures over 40% of the market share.

Tesla: 41.6%

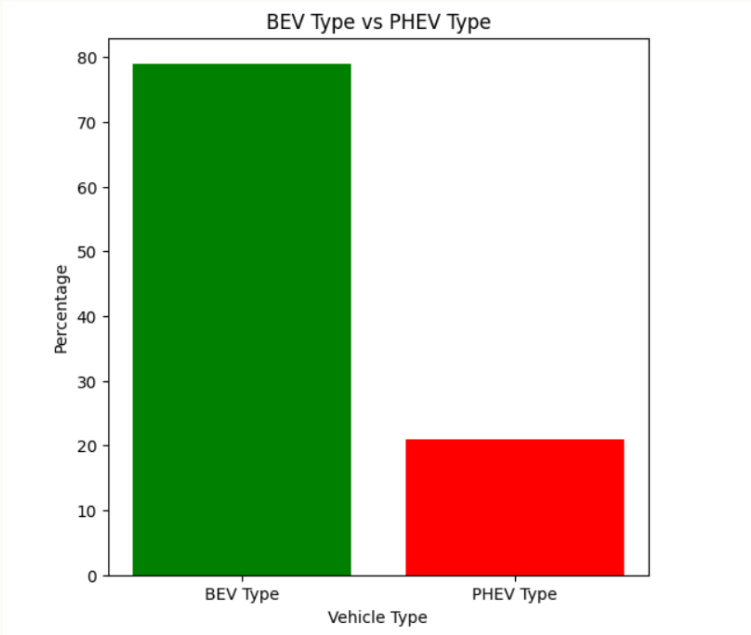

Chevrolet: 6.8%

Nissan: 6.7%

Ford: 5.5%

Kia: 4.8%

Vehicle Type Distribution

79%

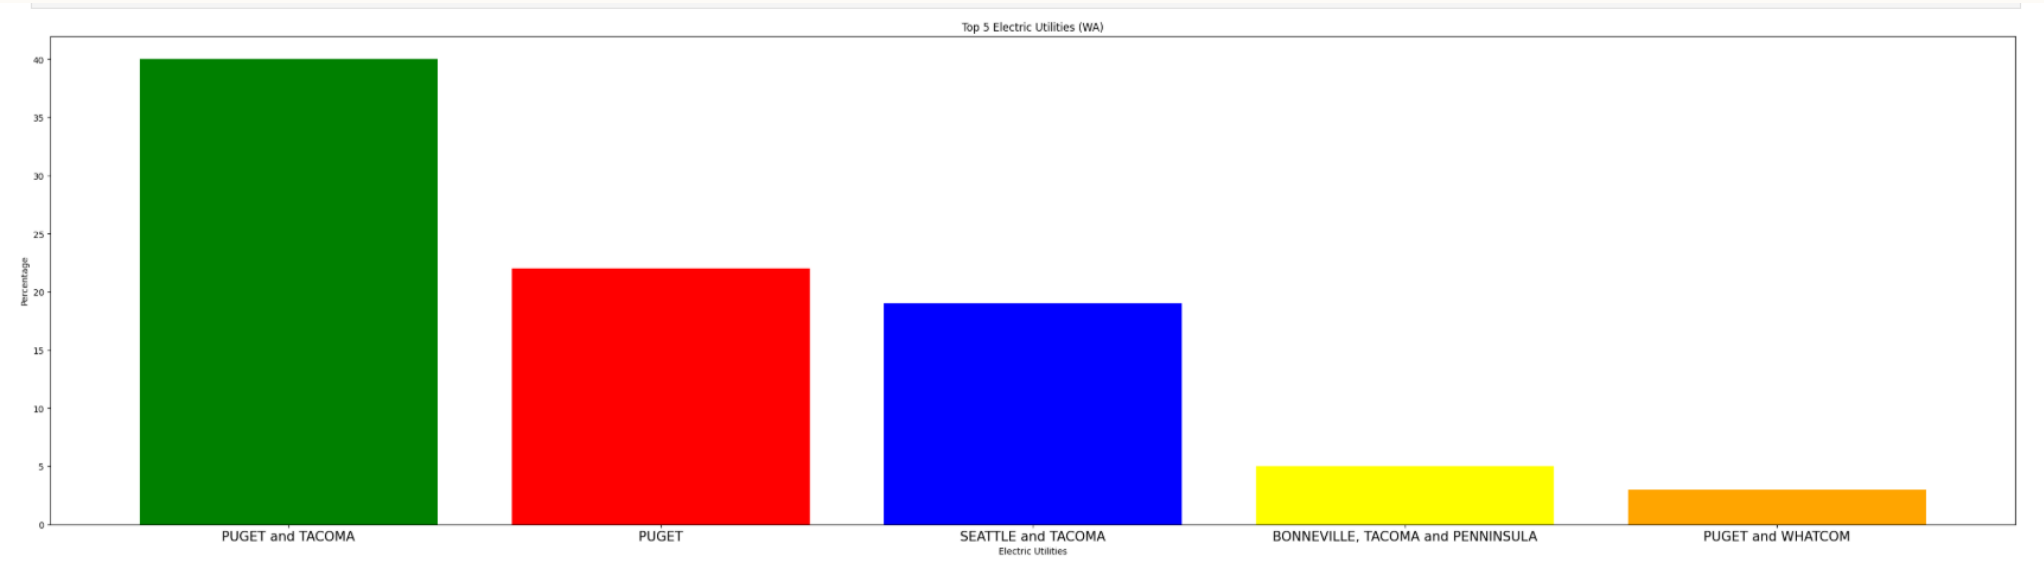

BEV (Battery Electric)

21%

PHEV (Plug-in Hybrid)

BEVs are the dominant vehicle type across the state.

Top Electric Utilities

A mix of Investor Owned, Municipal, Federal, and Cooperative utilities serve these areas.

Infrastructure deployment relies heavily on collaborative utility networks. The combined Puget Sound Energy and City of Tacoma networks support 40% of the state's EV grid demand. This highlights the critical role of investor-owned and municipal partnerships in powering dense urban centers.

Highest Average Electric Range

295miles

Snohomish County

Followed closely by King County at 277 miles. Suggests a preference for high-capacity batteries in these regions.

Range anxiety is effectively mitigated in top-adopting counties. Snohomish leads the state with an average electric range of 295 miles, directly correlating with its 92% CAFV eligibility rate. King County follows closely at 277 miles. This data points to a definitive consumer shift toward high-capacity, long-range battery architectures.

Clean Alternative Fuel Vehicle Eligibility

90%

Statewide CAFV Eligibility

Snohomish and King counties lead with ~92% eligibility. Eligible vehicles require an electric range between 30 and 520 miles.

Top CAFV Models: King County

Tesla Model Y

25,805 units sold.

48% of brand share

Nissan Leaf

6,848 units sold.

91% of brand share

Chevrolet Bolt EV

2,918 units sold.

44% of brand share

Top CAFV Models: Snohomish County

Tesla Model Y

7,343 units sold.

53% of brand share

Nissan Leaf

1,727 units sold.

87% of brand share

Ford Mustang Mach-E

717 units sold.

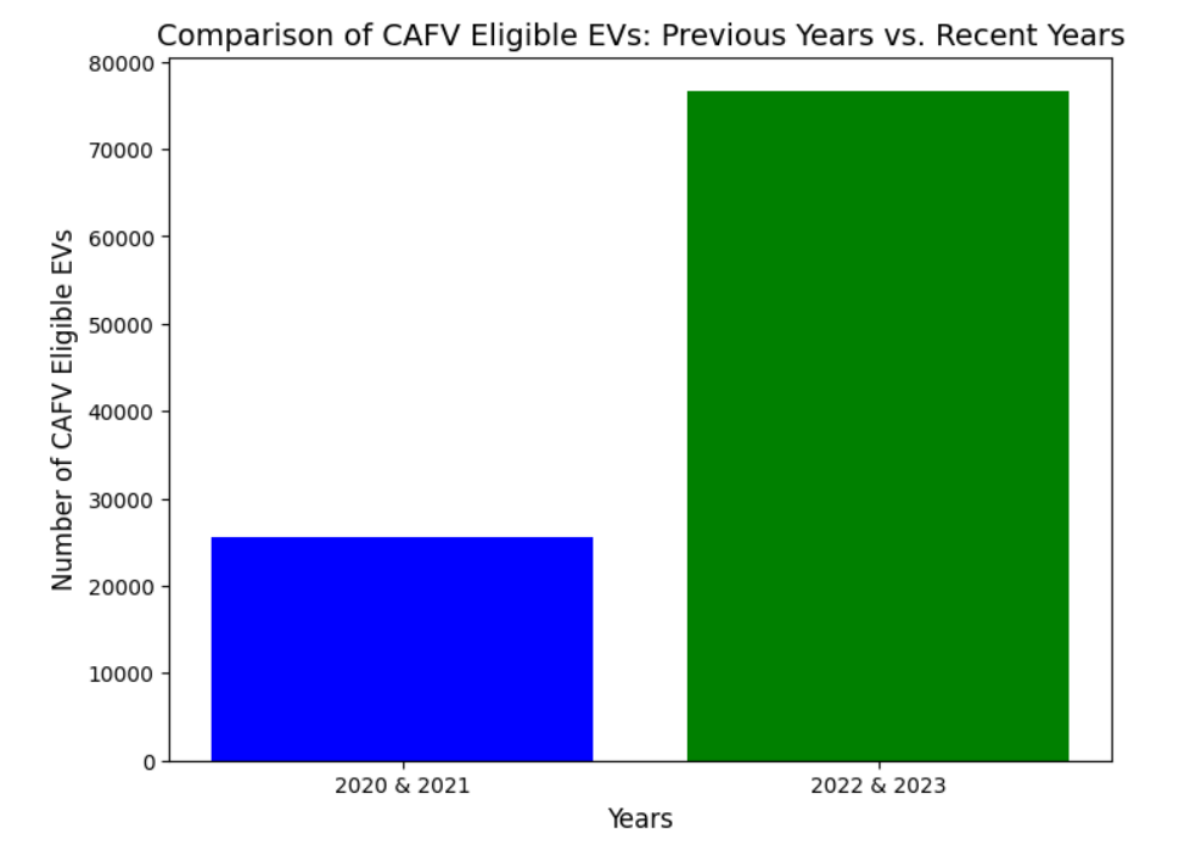

57% of brand share

Recent Surge in CAFV Eligibility

Massive increase in recent model years.

Sales of CAFV-eligible EVs in 2020-2021 represent only 33% of the volume seen in the 2022-2023 period, highlighting rapid market acceleration.
